CCTV VIDEO+POWER 50M READY CABLE

Sale Price: 1500.0

PRODUCT ID: **01224**

The CCTV Video + Power 50 m Ready Cable is designed for surveillance systems where cameras need to be placed far from the DVR or power supply – for example, across large properties, yards, or perimeter fences. By combining video coaxial and DC power in a single cable, it reduces wiring complexity and material cost compared to running separate cables. The pre-terminated BNC and DC connectors ensure quick, plug-and-play installation. Its compatibility with standard analog and HD-over-coax CCTV cameras makes it suitable for a wide range of setups, and the 50 m length offers flexibility in camera placement. This cable is ideal when you need reliable video transmission and power delivery over long distances in home, business, or commercial security systems.
